THE SUN BEATS DOWN, THE RAYS BOUNCE OFF, THE HOUSE STAYS NICE AND COOL.

WEYERHAEUSER RBS

When the sun beats down, the roof heats up, and that heat radiates through the insulation into a home’s living spaces making the air-conditioning system work overtime. Power bills soar and spaces without air conditioning become virtually unbearable.

It doesn’t have to be that way. Weyerhaeuser Radiant Barrier Sheathing (RBS) comes pre-fabricated with a reflective foil layer that reflects up to 97%* of the sun’s radiant energy, minimizing heat transfer through the roof and insulation to interior living spaces.

• Reflects up to 97%* of the sun’s radiant energy
• Helps increase energy efficiency
• Minimizes heat transfer to living spaces
• Engineered for quality and consistency
• Backed by Weyerhaeuser’s limited product warranty
WEYERHAEUSER RADIANT BARRIER SHEATHING

FRAME THE ROOF AND FOIL THE SUN—IN ONE EASY STEP.

Installing a radiant barrier is an efficient, cost-effective way to help keep interior living spaces comfortable while saving energy costs. Weyerhaeuser RBS provides all these benefits with no additional labor or material hassles.

Thanks to an innovative wood-resin combination, every Weyerhaeuser RBS panel is manufactured flat, installs flat and stays flat, and has been engineered to precise specifications to resist problems like cupping, warp, or sag. The radiant foil layer is perforated for ventilation, to protect against condensation and moisture build-up.

As an added plus, Weyerhaeuser RBS can even help keep unair-conditioned, uninsulated rooms like garages, workshops, and porches cooler, increasing a home’s usable space. A cooler attic is not only better for storage, it also puts less strain on attic-mounted appliances and ductwork.

** Actual savings will depend upon local utility rates, home size and climate.

LIMITED WARRANTY

Weyerhaeuser RBS Sheathing (RBS) is warranted by Weyerhaeuser NR Company against delamination of the OSB substrate for a period of 20 years from the date of purchase by the end user when properly installed as exterior wall or roof sheathing in a structure. Weyerhaeuser must be notified of any claim within 10 days of the discovery of the delamination or foil delamination.

In addition, RBS when properly handled, installed, maintained and utilized as roof sheathing in a structure.

This warranty does not cover the performance of RBS outside the U.S. or Canada. This warranty does not apply to any alteration, change or repair to any alteration, change or repair.

Upon request, Weyerhaeuser must be provided with reasonable proof of product and Canadian usage.

This warranty is only applicable to United States and Canadian customers and for U.S.

Filing a Claim

For any RBS that Weyerhaeuser determines at its sole discretion does not conform to

• Long-term reliable performance
• Less strain on attic-mounted appliances
• Cooler attics, garages, and porches
• Improved indoor comfort
• Helps lower utility bills**
