

Decking As Cladding

Amp up a home's curb appeal and use AZEK® deck boards as cladding. The combination of premium natural hardwood aesthetics and the durability of advanced polymer technology, backed by industry-leading warranties, will add brilliance to any home.

- CCRR-0266 (Code Compliance Research Report) available for Vintage, Arbor and Harvest Collections®.
*CCRR pending for Coastline®, Weathered Teak®, and English Walnut®
- Premium, low-maintenance alternative to traditional and exotic wood
- Can be installed with Cortex® to nearly eliminate the appearance of fasteners
- Class A Flame Spread for Vintage Collection®
- Works with TimberTech® AZEK® decking collections and colors

BEST PRACTICES:

- Must be installed over a weather-resistant wall
- Paint the furring strips a dark color to minimize visibility
- Fasten 16" OC over 2" x 4" pressure treated furring strips with approved fastener options
- Leave a minimum 1/8" gap between deck boards
- Install butt joints tightly
- Read the full installation guidelines at [TimberTech.com/installation-help](https://www.timbertech.com/installation-help)

Cladding deck boards use a square shouldered profile and are 1" x 5½"
All colors available in 16' and 20' lengths.
Kona, Brownstone, and Slate Gray also available in 12' lengths
