[2] Two trimmers (3") required at each end.

■ Symbol represents location of 1.8E Parallam® PSL header.

▲ Symbol represents supporting beam or structural bearing wall located at center of house, below floor.

General Notes:

- Tables are based on:
 - Uniform loads.
 - Simple span headers only.
 - Roof truss framing with 24" soffits.
 - Exterior wall weights of 80 plf, interior 60 plf.
 - Deflection criteria of L/240 live load and L/180 total load for roof only and of L/360 live load and L/240 total load for all others.
 - All members are restricted to a maximum deflection of 5/16".
- Minimum header support to be one trimmer (1½") at ends (unless noted otherwise).
- Trimmers must support the full width of the headers.
- Headers assume direct support on trimmers.
- Square sections may be installed in plank or beam orientation.
- Tables with 20 psf roof loading are also applicable for loading in non-snow areas (125%).

**Some sizes may not be available in all regions.
Parallam® PSL is intended for dry-use applications.**
