

PRO SERIES LUMBER

**WEYERHAEUSER HAS TAKEN WOOD
QUALITY TO A WHOLE NEW LEVEL**

REDUCED CULL, LESS HASSLE

**WEYERHAEUSER PRO SERIES™
LUMBER WITH ANTI-MOLD AND
ANTI-SAPSTAIN PROTECTION**

With Weyerhaeuser Pro Series™ Lumber, you benefit from patented technologies that help you reduce cull.

With these exclusive features, Pro Series Lumber:

- Saves you time and hassle
- Saves you money on inventory costs and product handling
- Is ideal for green building

In addition, Pro Series Lumber is protected with an anti-mold and anti-sapstain agent, which will help you reduce those piles of unusable lumber in your yard and on the jobsite.

IDEAL FOR GREEN BUILDING

Pro Series™ Lumber is made in North Carolina from locally grown timber, and depending on end use location, it can meet the regional material requirements for green building programs. In addition, Pro Series Lumber is:

- Certified and stamped. Pro Series Lumber is certified to the Sustainable Forestry Initiative® (SFI) standard and carries the SFI label on each board. This makes it even easier for builders to quickly spot these products in lumberyards and demonstrate their commitment to using responsible materials.
- Easy to specify for green projects. As with all Weyerhaeuser lumber products, Pro Series has been "Green Certified" by Home Innovation Research Labs for use in the National Green Building Standard™ and the Sustainable Attributes Verification and Evaluation Program™ (SAVE™). SAVE verifies the sustainability of building materials and provides guidance on how products may qualify for green building points within the five major green building standards.

THE PRO SERIES DIFFERENCE

Once in-service moisture content is reached, seemingly straight lumber can warp and become a costly nuisance.

Our processes remove problem boards from each unit so you save labor from sorting and inventory costs.

This product is Green Certified by Home Innovation Research Labs for meeting certain criteria in the National Green Building Standard.

Visit HomeInnovation.com/GreenProducts for details.

Weyerhaeuser Pro Series Lumber—manufactured in the U.S.A. using locally sourced raw materials. Support the local economy and contribute to the reduction of transportation related greenhouse gas emissions.
